## ROAD & TRACK

### Opel Speedster/Vauxhall VX220

No one can argue about the fact that this car is one of the most fun track-day cars on the planet, built in the Hethel factory in Norfolk/Great Britain. The fantastic combination of a light-weight fibreglass body, aluminium chassis, 4-cylinder engine and a top speed touching 240 km/h makes all motorsport enthusiasts smiling up to the ears.

The aim for the engineers at Öhlins R&D department was to create a shock absorber that did not only target at better comfort but also at increasing the performance and handling, cutting precious time on the track. The end result is a 36mm aluminium cylinder shock with compression and rebound adjusters along with a clever height adjuster.

## FEATURES

### General

- > Light weight
- > One way compression adjuster
- > One way rebound adjuster (shaft bleed) also acts as temperature adjuster
- > Height adjustable (spring preload)
- > Coil springs (front 62N/mm, rear 85N/mm)
- > Rebuildable
- > Revalveable

For a complete set, order one of each part number.

### PART NO

OPV1 E00  
OPV2 E00  
OPV3 E00  
OPV4 E00
